- Digital & Analog Inputs
- Logic Function Channels
- GRMS Communication
- Virtual Card-holder / Energy Saver

Smart Home

Lighting / Dimming
Experience the uniqueness of smart lighting in your home with Interra lighting/dimming solutions. Create personal lighting scenarios suitable for your own lifestyle.

HVAC Solutions
Did you know that building automation systems can save approximately 30% on the energy consumption of buildings? Irregular heating and cooling are some of the biggest parts of the energy costs in a home. With reliable integration of Interra HVAC solution devices, you can control the operating times of your heating and cooling systems as your wish.

Smart Scenarios
Your life, your choices. With Interra smart home technology, you can create your own scenarios and activate them with one click to enjoy the comfort you desire in your sweet home. Do you want your home to welcome you every day at 18:00 with its lights turned on, curtains closed and temperatures reached 25 degrees? It's done.

Mobile Control

Curtains / Blinds / Gates
You can arrange scenarios for and control most of the devices working with motorized systems like curtains, blinds, gates with Interra smart home technology.

Mobile Solutions
InterraPro application allows you to control your smart home with your Android or IOS mobile devices. All features like automation scenarios, concierge services, alarms, cameras, intercom communication can be controlled wherever you are and you can get instant notification from your home if someone ring on the door or if there is an emergency situation.

Security Integrations
- Camera Control
- Burglar Alarm
- Fire Alarm
- Water Flood Detector
- Gas Leak Sensor
- And many more...

Sip / Voip Based Communication
You can communicate with your guests via IP-based intercoms at the door of the building and touch panels inside the building.

- Voip
- Sip
- Log Notification
- Card Pass System
- Call Diversion
- Face Recognation

Concierge and Residence Services
The Services menu of Interra Touch Panels and InterraPro mobile application provide unlimited solutions for residence management and your needs in a home. The services you have required by using Interra devices are instantly sent over to the reception or building management of the residence and also provide communication systems between management and residents.
